COURSE DESCRIPTION:

Building on practice courses, this course is designed to continue to facilitate the integration of students' learning from field, practice, and theory courses for the purposes of their professional development. It will provide students the opportunity to critically reflect upon their practicum experience, monitor their practice development, continue to develop practice skills within a social work values and ethical context, and make connections between thinking, feeling, and doing, in relation to being a social worker.

Social Work 416 is a required course and is open only to students accepted into the School of Social Work. All third year courses, including practicum, must be completed before entry into Social Work 416. Social Work 405 must also be completed. Usually, Social Work 416 runs concurrently with Social Work 415.

COURSE OBJECTIVES:

Recognizing that dynamic and effective practice is iterative and involves the ability to blend practice methods with theories as well as the corresponding ability to develop working relationships with others, this course will encourage students to continue to examine their own developing skills and awareness of self in this role. Building on Social Work 316, this course will explore philosophical and ethical dilemmas associated with practice and help students to develop the means for considering and dealing with these common conundrums of practice. It will also reinforce students' strengths and gifts.

This course acquaints each student with the various elements of professional development by providing an opportunity to participate in a collaborative discussion about their field placement experiences and the integration of these with their classroom learnings. Throughout the course, students will be working toward developing ways of approaching practice by utilizing a consolidation of their learning in other courses, by continuing self-assessment of skills, by analyzing experiences to date, and by readings which will be identified depending on need and interest.

-LEARNING OUTCOMES:

1. Students will critically analyze social work practice experiences through peer review, constructive feedback and consultation.
 2. Students will participate and contribute in a supportive learning environment.
 3. Students will actively participate in discussions of professional issues, practice situations and ethical dilemmas.
 4. Students will examine and discuss the applications of theory in practice and the appropriateness and suitability of various practice methods, particularly as they relate to their field practicum.
 5. Students will participate collectively and collaboratively in furthering their learning and promoting professional development.
